

Lake Rosalind Residents

Over the past several years, the Water Quality Committee has been collaborating with Carl Seider from Source Water Protection developing effective strategies to keep our drinking water safe.

The Water Quality Committee is now engaging with Brockton Municipality in a review of best practices to ensure sustainable and healthy drinking water. Healthy drinking water also means safe and healthy water for swimming and other recreational activities. For this reason, the completion of the survey below is appreciated so that current and accurate data can be shared in discussions with the Municipality, Federation of Cottage Owners Association (FOCA) as well as other agencies.

Water Quality Committee

**Name:** \_\_\_\_\_

**Address:** \_\_\_\_\_
